

WHAT IS ASSISTIVE TECHNOLOGY?

Assistive Technology (AT) is any item or piece of equipment that improves independence and access for people with disabilities. There are many types of AT. Some are low tech and some are high tech.

Low Tech AT are basic devices that don't require much training and are usually low-cost.

LOW TECH AT

Magnifying Glass

Reacher or
Grabber

Pen and Paper

Timer

Large Print

Pencil/Pen Grips

HIGH TECH AT

High Tech AT are more complex devices that may be expensive. You may need training to learn how to use high tech AT devices.

FM System

Specialized
Keyboard

Tablet

Voice-Activated
Telephone

Video Phone

Camera Glasses

***Note that the ADA generally does not require businesses/workplaces to provide personal medical devices.**

Disability Rights Tennessee (DRT) is the Protection & Advocacy system for Tennessee. The contents of this publication were developed and made possible under grants from the Department of Health and Human Services, Administration for Community Living; Substance Abuse and Mental Health Services Administration; Department of Education, Rehabilitation Services Administration; and the Social Security Administration; at taxpayer expense. Grantees undertaking projects with government sponsorship are encouraged to express freely their findings and conclusions. The contents are solely the responsibility of DRT and do not represent the opinions, policy, or official views of the federal funding administrations above and you should not assume endorsement by the Federal government.
